

Stop Wasting Braking Energy

Start Saving Money

Cut fleet fuel and operating costs and get a quick ROI.

Start Saving Time

Spend less time fueling and maintaining your fleets trucks and buses.

Start Saving the Environment

Cutting CO₂, NO_x, and PM means cleaner air and healthier communities.

Start Improving Safety

More power for acceleration, and shorter stopping distances can reduce accidents and fleet liability.

Start Improving Operator Engagement

Engaging your drivers in the safe and effective operation of your hybrids can maximize the success of your efforts.

Start Using Advanced Technology

Our patented hydraulic hybrids give your fleet an advantage – all without batteries or new infrastructure!

hydraulic hybrids

The Lightning Hybrids ERS (Energy Recovery System)

STOP AND GO

Your braking powers your acceleration!

SMART INVESTMENT

Customers report ROI in one to five years

GRANTS AVAILABLE

Let us help you find a grant!

Why Lightning Hybrids?

Simple to install. No changes are made to engine management or exhaust and emissions controls.

Available on a wide range of medium and heavy duty vehicle platforms worldwide.

Lightning Hybrids maintains a global network of dealers, upfitters and service providers so we're always close to your operations.

Benefits

- Saves fuel
- Reduces harmful emissions
- Extends vehicle life
- Telematics for fleet intelligence
- Functions as a brake retarder

We can turn any vehicle green

Ideal for the stop-and-go of bus routes, delivery rounds and refuse collection, the ERS is a perfect match for your fleet. Available now, it saves fuel, extends brake and engine life, and cuts emissions — something that's especially important for your community. Purchase it for new vehicles, or get it retrofitted to your existing inventory — even your oldest buses or trucks can be updated to be leaner and greener.
